Skills

Java, Python, C++, Web Development, HTML, CSS, JavaScript, Flutter, Dart

Experience

V2V Education LLP, Software Developer (1)

As a software developer, my experience involves crafting innovative solutions through coding. I excel in translating complex problems into efficient algorithms, while collaborating seamlessly with teams to deliver robust software products. My skill set encompasses designing, developing, testing, and maintaining applications, ensuring optimal performance and user satisfaction.

Accunity, Frontend Developer (1)

As a Frontend Developer, I create the visual and interactive aspects of websites and applications. I build user interfaces using HTML, CSS, and JavaScript, ensuring seamless user experiences across different devices. My focus is on crafting intuitive designs that are both aesthetically pleasing and highly functional.

Projects

E-Commerce Store(www.ecommerce.com)

An e-commerce project involves building an online platform that enables the buying and selling of products or services. This includes creating a user-friendly interface for browsing and purchasing items, secure payment gateways, inventory management systems, order processing, and customer support functionalities. The goal is to provide a seamless shopping experience while maximizing sales and customer satisfaction.

Recipe Management System (www.recipesys.com)

A recipe management system is a digital platform for organizing, storing, and accessing recipes. It typically includes features such as recipe creation, editing, and searching, as well as the ability to save favorites, create shopping lists, and track meal plans. Some systems may also offer nutritional information, cooking time estimates, and even interactive cooking guides. Essentially, it's a virtual cookbook designed to streamline the cooking process.
